Introduction

Thank you for taking this course and wanting to learn how to do numerology readings.

Over several years of doing numerology readings at mind, body and spirit (MBS) shows, we've had many people ask us if we do any workshops?

We occasionally do them and decided it would be a good idea to create an online course so anybody, anywhere can learn how to do it.

What we are going to teach you is how to do a **show reading**, in other words, you're going to learn how to do the exact same reading we've been charging people for in recent years at the MBS shows.

You'll effectively become a mini-numerologist and at the very least, be able to have a bit of fun with your friends and family, you'll then understand why they act the way they do, there's no hiding place 😊.

If you really study this material and become very proficient at working out a person's numbers (and carry a set of charts), you could even charge people for readings! Why not, we've done close to 1,000 readings with this very same information.

Food for thought!

We sincerely hope you gets lots of value from it and have plenty of fun as you put the information to good use.

With love & blessings

Stephen & David

Numerologists, Health & Wellness Mentors.

Section 1 ~ The basics of numerology

What is Numerology?

Numerology is the universal language and science of numbers which is said to have been created by Pythagoras, the Greek mystic and mathematician, more than 2,500 years ago.

It is based on the premise that **you are a timeless soul** who has lived, and will continue to live, many lives for the purpose of evolving your soul. In your quest for self-mastery, you choose a pre-set agenda each time, consisting of the specific lessons you'd like to learn and the destiny you endeavour to fulfil, whilst you're here—**all the details of which are found in your 'numbers'**.

Each character in your date of birth and full name (n.b. each letter in your name converts to a number between 1 – 9 with numerology) represents a vibrational frequency which corresponds to specific traits and abilities (both positive and negative) you possess, that make you who you are.

Some of your numbers have a greater influence than others but you are essentially a blend of all the corresponding vibrations contained in specific character groups plus the individual characters, within your full name and date of birth. There's huge depth to numerology, how deep you wish to go to discover the real you, is entirely in your hands!

To recap.... **you have prechosen your 'numbers'** prior to this incarnation to provide the necessary tools and experiences to assist you in your soul's quest in this lifetime. In other words:

Your name and date of birth are no accident...you chose them!

But surely my parents chose my name I hear you ask? They did officially name you, but what really happened is you quietly influenced your parents from the higher vibrational spiritual realm.

So, encoded in your name and date of birth is your soul's blueprint for this lifetime that was set-in motion long before you entered this world. They reveal your deepest motivators, the innate gifts you were born with, the lessons you're meant to learn in this lifetime and much more.

Numerology is the key to helping you decode this powerful information that you have forgotten, it will help you see the bigger picture and discover the real you!

Why don't you remember any of this?

Because you incarnated for the purpose of evolving your soul, you had your memory wiped prior to birth, this is often referred to as the 'vale of amnesia.' If you carried all your soul's wisdom through each incarnation, you'd already be wise and wouldn't benefit from the lessons and growth your soul is seeking through each human experience.

Planet earth is effectively a school that you have chosen to come to with eagerness and excitement because of the wonderful opportunity it offers you (with its dualistic setting) for evolving your soul through life lessons and experiences.

Unfortunately, because your memory was wiped prior to birth and nobody really explained this stuff to you, you're likely to be none the wiser, until now!

Fortunately, through Numerology and similar spiritual disciplines you can begin to understand your true character and purpose in this lifetime and the specific lessons you came here to learn 😊.

Accompanying videos

We've attempted to explain in this guidebook how each of the 7 elements is worked out but please also watch the accompanying videos on the online course for a fuller understanding.

Mistakes

You may notice the odd grammatical mistake in the written traits/characteristics on a few of the charts. Please excuse this, a lot of the information is channelled through Stephen and he just lets it flow onto the paper as it comes through (he doesn't even notice in that state), but we've kept them in for authenticity, so go easy on him 😊.

There are also additional videos covering the basics of numerology on our you tube channel, which you can find [here](#).

The Energetic Meaning of Each Number

In a nutshell, there are only 9 numbers to deal with in Numerology, 1, 2, 3, 4, 5, 6, 7, 8 & 9 that's it 😊 you don't need to know any others, not even 0 as it has no effect!

The reason is that every number in existence, no matter how big, reduces down to a number between 1 – 9, we'll show you how this works very shortly.

The only exception to reducing down is occasionally (we'll point out when), when we have a sequence of the same numbers such as 11, 22, 33 etc. These are referred to as master numbers as they carry additional energy, you'll get the gist as we go through it.

Reducing down, simply means adding all the digits in a number together (and if the total is more than 9, then add all the digits of the total together) until you have a single digit between 1 - 9, here are some examples;

the number **31** would reduce to **4** ($3 + 1 = 4$).

the number **248** would reduce to **5** ($2 + 4 + 8 = 14$, then $1 + 4 = 5$).

the number **1987** would reduce to **7** ($1 + 9 + 8 + 7 = 25$, then $2 + 5 = 7$),

The same applies to letters, in western numerology all 26 letters correspond to a number between 1 – 9 as follows;

A	B	C	D	E	F	G	H	I
1	2	3	4	5	6	7	8	9
J	K	L	M	N	O	P	Q	R
1	2	3	4	5	6	7	8	9
S	T	U	V	W	X	Y	Z	
1	2	3	4	5	6	7	8	

So, every number and letter correspond to an underlying energetic frequency between 1 – 9 and once you know how to interpret these 9 basic frequencies, you're effectively a mini numerologist 😊!

Here's the general energetic meaning of the numbers 1 – 9;

- 1 ~ Individualistic, Independent**
- 2 ~ Cooperation, Peacemaker**
- 3 ~ Creative, Expressive**
- 4 ~ Worker, Process, Foundations**
- 5 ~ Freedom, Adventure**
- 6 ~ Nurturer, Caretaker**
- 7 ~ Truth-seeker, Contemplative**
- 8 ~ Power, Abundance, Finance**
- 9 ~ Humanitarian, Global Awareness**

We've kept the traits very generic for simplicity, each number has a lot of depth with both positive and negative traits.

The Numerology 1 – 9 Cycle

Everything in the universe vibrates and moves in cycles. This includes all humans who live in continual 9-year cycles, whether they know it or not.

In addition to the above general meanings of each number, now we'll show you how the numbers 1 – 9 are sequentially connected and reflect a complete journey or a cycle, as follows...

1. **Ignition** ~ the birth of a new journey, full of energy and ambition.
2. **Feeling Life** ~ emotional seesaw (duality), relating to another.
3. **Expressing Life** ~ adds inspiration and expression to create new ideas.
4. **Erecting the Structure** ~ down to earth, bringing ideas into reality.
5. **Exploring the structure** ~ a quest for knowledge, experience and discovery.
6. **Vision of Perfection** ~ seeking fulfilment through harmony and perfection.
7. **Realising Perfection** ~ mystical transformation, seeks to heal life.
8. **Perfection Reworked** ~ the strategist and organiser, rework and rebuild.
9. **Completing the cycle** ~ dispensing the knowledge/wisdom of the journey.

If you know what year you are in, you can use this information to your advantage. E.g. as we launch this course (2023) both of us are in a **4 year** (erecting the structure) so the energy is ideal for us as we're building (erecting) the foundations and platforms to put out the information we want others to benefit from over the coming years.

How to work out what year of the 9-year cycle you are currently in;

You substitute the **current year** into your birthdate and reduce to a single figure. E.g. Stephen was born on 30th December 1964, so here's how we work out what his current year is;

Current year birthday: **30th December 2023**

Add together and total up: **3+0+1+2+2+0+2+3 = 13**

Reduce total (if above 9): **1 + 3 = 4**

So, he's in a **4 year** in 2023 (erecting the structure), next year (2024) he'll be in a **5 year** and so on.

Section 2 ~ The 7 elements of a numerology readings

1. Life Path Numbers (most influential number)

Your life path number determines your core character traits to suit the path you've chosen to walk in this lifetime. It is the most influential of the core numbers.

Here's a demo of how to work out a life path number;

All you do is add together all the digits in your date of birth and keep adding the digits in the total (i.e. reduce down) until you have a single figure. The only exception to reducing down, is if the total adds up to either 11, 22, 33. Examples;

E.g.1 The birthdate: **05th October 1969:**

Add all the digits... **0+5+1+0+1+9+6+9 = 31**

Now add **3+1= 4**

A person born on 5th Oct 1969 is a **life path 4**.

Life path 4's can be summarised as **the dedicated workers** of society, if you want to get things done, make sure you have some life path 4's on your side.

E.g.2 The birthdate: **07th October 1992:**

Add all the digits... $0+7+1+0+1+9+9+2 = 29$

Now add $2+9= 11$ (not reduced any further as 11 is a master number)

A person born on 7th Oct 1992 is primarily a **life path 11**.

*However... $1 + 1 = 2$ so they're also a **life path 2** so they get to have 2 life paths and are referred to as an **11/2 life path**.*

Life path 11's can be summarised as **intuitive healers**, they make very good teachers, healers and carers/nurses. Life path 2's can be summarised as **cooperative peacemakers** and make very good mediators and friends.

E.g.3 The birthdate: **04th September 2018:**

Add all the digits... $0+4+0+9+2+0+1+8 = 24$

Now add $2+4= 6$)

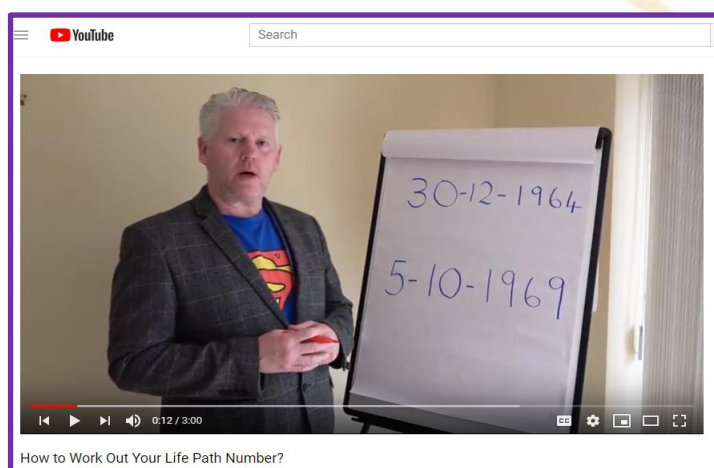

A person born on 4th Sep 2018 is a **life path 6**.

Life path 6's can be summarised as **nurturing caregivers**, they make very good parents, teachers, carers/nurses.

Now, work out your life path;

Your date of birth: $\boxed{D} + \boxed{D} + \boxed{M} + \boxed{M} + \boxed{Y} + \boxed{Y} + \boxed{Y} + \boxed{Y} = \boxed{T} \boxed{T}$

Reducing the total: $\boxed{T} + \boxed{T} = \boxed{L}$ life path.

2. Birthday Numbers

Your birthday number holds lots of information about your personality traits. It is the second most influential number in your personal numerology chart.

It is very simple to work out, it's the day of the month you were born, so if you were born on the 1st you're a **1 birthday** number, born on the 2nd you're a **2 birthday** number and so on.

If you were born after the 9th of the month, you just add the 2 figures in the date and reduce to a single figure between 1 – 9. Examples:

- i) Born on 16th of the month, you would be a **7** (1 + 6) **birthday** number
- ii) Born on the 26th of the month, you would be an **8** (2 + 6 = 8) **birthday** number

The Elements ~ Big Influence on Mating & Dating!

Have you ever wondered why you hit it off with some people but clash with others?

Have you ever had a relationship (partner, friend or colleague) where you get on very well most of the time, but occasionally, one of you loses it and explodes?

You could say the tension builds up over time to a tipping point and then the frustration is unleashed!

Ever had that?

We'll come to romantic compatibility shortly (page 33) and explain how life path energies interact as we all have natural and compatible matches along with the odd challenge, dependent on each person's life path.

However, as we've just gone through the elements with the birthday numbers, now is a good time to cover the influence of these elements as they'll help you understand a lot about human behaviour!

There are 4 core elements;

Air, Water, Fire & Earth.

As you now know, we each have a ruling element connected with our birthday number and when we interact with others, our elements interact too (our energies are constantly interacting). Let's have a look at all the interaction combinations...

- **Fire & Air** ~ Fire needs air so they get on 'like a house on fire!' **natural match** 😊
- **Fire & Water** ~ Fire can boil the water & water can put out the fire, **potential conflict!**
- **Air & Water** ~ Air can cause a tsunami with water, **potential conflict!**
- **Fire & Earth** ~ The earth happily allows fire to happen, **natural match** 😊
- **Air & Earth** ~ The earth is happily surrounded by air, **natural match** 😊
- **Water & Earth** ~ The earth is happily covered by around 70% water, **natural match** 😊

Earth is effectively neutral, it's supporting all the elements, so anybody with an earth element (6 & 8 birthdays) should generally get on with everyone.

It's the interactions between **fire & water** along with **air & water** where the energy can potentially conflict and cause tension.

Reality check ~ In your mind, quickly scan some of the people close to you (whose birthday number you know) where there's been the occasional bit of tension/conflict and check how the elements interact...are they compatible or conflicting?

1. Expression (Name) Number

The expression number is derived from your name and is how someone expresses themselves to the world.

It is sometimes referred to as the destiny number, as this number is the foundation on which your life path can flourish.

To work out an expression number, all you do is convert each letter in the name to its corresponding 1 – 9 number (see alphabet below) and then reduce to a single number.

A	B	C	D	E	F	G	H	I	J	K	L	M	N	O	P	Q	R	S	T	U	V	W	X	Y	Z
1	2	3	4	5	6	7	8	9	1	2	3	4	5	6	7	8	9	1	2	3	4	5	6	7	8

N.b. this bit involves the most maths as you've got quite a few numbers to add up 😊!

Example:

Name: **DAVID PAUL KING**
As numbers: 41494 7133 2957 = **59** >>> 5 + 9 = **14** >>> 1 + 4 = **5**
(=22) + (=14) + (=23)

So, David Paul King has an expression (name) number of 5.

Important: You can have multiple expression numbers to suit as many people use multiple names depending on circumstances, here's an example:

David has 2 main ones:

- i) Birth name: **David Charles Orrey** = 88 which reduces to **7** (8 + 8 = 16) **expression**
- ii) Work name: **Dave Orrey** = 50 which reduces to **5** (5 + 0 = 5) **expression**

David identifies strongly with the 7 energy in his full name expression chart and he also identifies strongly with the 5 energy in his shorter name (Dave Orrey ~ which he uses for his day to day business) as it feels just right for his business identity.

As we live in a conscious universe where our consciousness create our reality, use whatever name(s) the person identifies with. We generally work out multiple during shows, always the full birth name (as the person came in with that one) plus any other combination they generally use.

The best way to ascertain what names to do is ask the person how they would introduce themselves in a friendly setting. Include nicknames if the person strongly identifies and introduces themselves with it.

2. Arrows

Arrows are natural strengths or challenges contained in a person's **birth chart**.

You simply superimpose the persons date of birth on the 1 – 9 number grid shown below. Here's an example using Stephen birthday **30/12/1964**;

3	6	9
2	5	8
1	4	7

Blank number grid

3	6	9
2	5	8
1	4	7

Highlighting all the **numbers** in Stephen's birthday

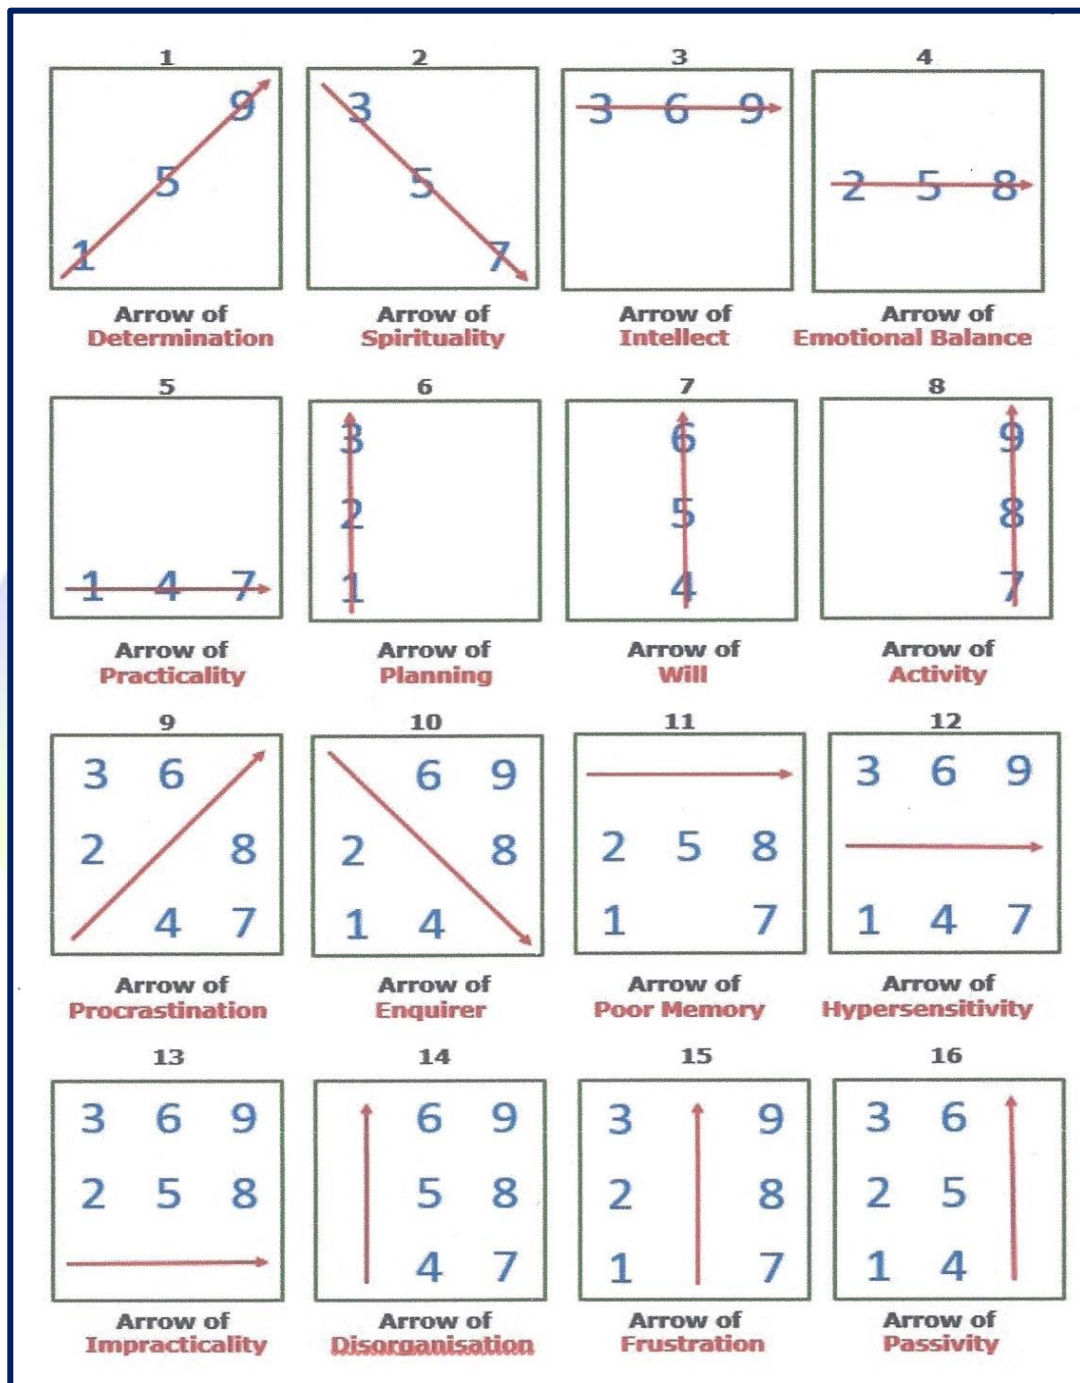

3	6	9
2	5	8
1	4	7

Connecting the arrows (any **3 numbers** or **blanks** in a line)

An arrow is depicted when 3 numbers or 3 blank spaces from the chart line up vertically/horizontally or diagonally. You can see on Stephen's birth chart he has 2 arrows '**123**' and '**369**.'

There are **16 potential arrows**. Not everybody has arrows, the most you can have is 6 (very unusual), most people tend to have 1 or 2. Here's what they mean;

The label under each one gives you a basic idea what each one means; you can deduce from the name that the top half (1 – 8) are perceived more as strengths and the bottom half (9 – 16) tend to be more challenge based.

Stephen goes through a detailed explanation of all 16 (plus no arrows) in the arrows lesson video within the online course.

3. Feng Shui

The numbers 1 – 9 all correspond to one of the 5 natural elements (water, fire, earth, wood & metal) which help your wellbeing and raise your vibration.

To see how a person matches, take their date of birth and superimpose it (just like with the arrows) on the feng shui grid below to see if any of the 5 elements are missing.

The person is naturally aligned with elements which correspond to their birth chart. E.g. if we use Stephen's birthday **30/12/1964**, you'll see he covers all 5 elements (1 = water, 2 = earth, 3 = wood, 6 = metal, 9 = fire) therefore he is fully aligned to the elements.

However, if we superimpose David's birthday **05/10/1969** onto the grid, he has 4 of the elements (1 = water, 5 = earth, 6 = metal, 9 = fire) but he doesn't have a **3** or a **4** in his birth date, therefore he is missing the element of **wood**.

3 WOOD	6 METAL	9 FIRE
2 EARTH	5 EARTH	8 EARTH
1 WATER	4 WOOD	7 METAL

Remedy: Here are the recommend remedial actions to add the vibration of any elements that are missing:

<u>MISSING ELEMENTS</u>	
METAL	→ CONSIDER WEARING METALIC JEWELERY
WOOD	→ CONNECT YOURSELF WITH TREE SPIRITS ALSO TAKE WALKS IN NATURE
EARTH	→ PLEASE CONSIDER HAVING HOUSE PLANTS TO BALANCE YOUR ENERGY
WATER	→ TAKE UP A ACTIVITY INVOLVING WATER ALSO CONSIDER A WATER FEATURE
FIRE	→ WITH SAFETY IN MIND ALIGN YOUR ENERGY WITH ANYTHING TO DO WITH FIRE . EG. CANDLES , FIRE PIT, SMOKE

4. Harmonising Colours

5. Love & Romance Compatibility

Love & Romance compatibility is based on the person's **life path number.**

We label this element as love & romance as that has the most demand, but it relates to how any 2 people energetically match.

We all project an energetic frequency (vibration) and in a nutshell, when someone has a similar frequency to us, we naturally feel in tune with them. This explains why we get along easily with some people and can be challenged by others.

Energetically we can grade the interactions in 3 categories as follows;

- **Natural matches** ~ generally feels effortless to get along.
- **Compatible matches** ~ should get along fine but may need the odd bit of effort.
- **Challenge** ~ potential to get along but you may clash or just not feel it!

N.b. master numbers 11, 22 & 33 all revert to their respective underlying life path numbers of 2, 4 & 6 for life path compatibility purposes.

Here are the 9 number charts to see how all the life paths energetically interact;

When it comes to compatibility, we use 2 key factors in numerology;

1. **The elemental interaction as shown on page 21.**
2. **The Life Path interactions in the following 9 charts.**

Although you'll need to find out each person life path to work out the energetic compatibility between any 2 people, it is well worth the effort.

Example:

1. **Elements:** Stephen is a 3 birthday (see page 16) which means his element is **Fire** and David is a 5 birthday (see page 17) which means his element is **Air**. Air & Fire naturally go together which means our elements are naturally matched.
2. **Life paths:** Stephen is a **life path 8** and David is a **life path 4**, you can look at either the 8 or the 4 chart (see page 34) and you'll see we are naturally matched energetically.

Conclusion: We are naturally matched on both counts and will find it easy and natural to get along 😊.

Awareness is the Key!

Now we've gone through the 2 key interactions (life paths & elements) to determine the energetic compatibility between 2 people, please don't go and file for divorce if you find that both conflict with a current partner, saying "Kirkbride & Orrey said, it'll never work!"

Just the awareness of this information is more than half the battle, just knowing yourself and your partner, allows you to **understand** what's energetically going on and love & respect any differences 😊.

The most important thing at the beginning of any relationship is the connection/spark that brought you together.

If you find one person winds the other up (e.g. ‘the **fire** boils the **water**’ or ‘the **water** puts out the **fire**’), just by being aware of this information you can spot potential unrest/conflict building up and ‘nip it in the bud’, which is simply emotional awareness & maturity (thanks to numerology 😊).

Section 3 ~ Bonus Material

The 26 Alphabet Charts

All 26 letters of the alphabet have a set of general traits, you’ll recognise quite a few from the letters in your own name but not necessarily all of them as you have free will and you will change over time as you learn (usually the hard way 😊) and experience life.

Here’s a recap of the underlying number (1 – 9) of each letter in the alphabet:

A	B	C	D	E	F	G	H	I
1	2	3	4	5	6	7	8	9
J	K	L	M	N	O	P	Q	R
1	2	3	4	5	6	7	8	9
S	T	U	V	W	X	Y	Z	
1	2	3	4	5	6	7	8	

Your name is a blend of all the corresponding general traits from each letter. If you have any letter occurring multiple times, it simply means those corresponding traits are enhanced.

The Energy of A House Number

Everything we **consciously** number, we add a corresponding energy to, including houses.

We can pretty much guarantee when you first walked into your current house, it felt right, yes? You've probably also walked into other houses and immediately felt uncomfortable!

This is because everything is ultimately energy, and your personal energy interacts with the houses energy, and you get a corresponding feeling.

To work out its energy, you just reduce your house number down to a single digit between 1 – 9 and the following chart shows you what type of energy it emits. 

House Number	Energy Type
1.	FOSTERS INDEPENDENCE
2.	ENCOURAGES LOVE
3.	PROMOTES COMMUNICATION
4.	STUDY AND SECURITY
5.	NON STOP EXITEMENT - OFTEN CHAOTIC
6.	HOME LOVING - FAMILY
7.	HOUSE OF STUDY + SPIRITUAL
8.	MONEY MANAGEMENT. LEARNING TO LISTEN TO OTHERS
9.	ALL ARE WELCOME. LEARNING TO FORGIVE UNCONDITIONALLY

Now, would you like to know how to temporarily change the energy of your house anytime you wish (to suit daily plans), without officially changing the numbers?

Let's say you live at number 41 ($4 + 1 = 5$ energy) your house has the energy of 'nonstop excitement' which is ideal if you want a lively house or having a party.

However, let's say you want a nice peaceful environment to study (7), all you need to do is write a number 2 on a piece of paper or post-it note and stick on the inside of the door (or by the hinges if you don't want it to be seen) along with the intention of having a peaceful/spiritual energy. This changes the house energy to a 7 ($4+1+2$).

If this seems a bit too easy or you find it hard to understand how it could possibly work, we recommend looking up the work of Japanese scientist Dr Emoto who has proven beyond doubt that our thoughts change the crystalline structure of water. The house numbers work on the same energetic principle, the numbers have a natural energetic frequency which is then reinforced with conscious intent as we all create our perceived reality via our thoughts, feelings and beliefs.

Try it, you'll be amazed!
